

Violet

Hippo Campus

You see with golden eyes
The novocain lullaby
Reach and crack the sky
With an open mouth, peace inside
American eyes
Cherry cheeks and bloodshot eyes
American eyes
See peace on earth, and truth in lies

Violet, trying to start your riot
Trying to get up and then go
So the world will always know
Violet, you and your fucked up riot
Trying to get up and then go
So the world will always know

Then you'll come to me
With a bitter wind, in agony
Clean the reds, you'll see
The sky is lushed in the company
Of those American eyes
See good on earth and truth in lies

Violet, trying to start your riot
Trying to get up and then go
So the world will always know
Violet, you and your fucked up riot
Trying to get up and then go
So the world will always know

You go go go...

Violet...
Oh, Violet...
