

Hoe'pocalypse Now

His Statue Falls

I hate the way you're acting
I hate it so so much
It even takes my last breath
I'm feeling so so lost
We had a deal I guess
And we talked a lot bout that
Right now it seems as if you changed
And I'm alone with it

Tell me why
We need to go through this
Will it be
My neverending nightmare
I am down
With all your specialties
So let me live
The way I live

You're on the road to nowhere
You need to get it now
Before you're all alone
It's not too late to turn back
I'll guide you home
Be sure that help is on the way

You're right I made mistakes
And I do apologize
But theres no need to have an argument
Just every night
There's only one way left
So please let me prove my promise
And after that you have the right
To judge me finally

Will you ever really try
To feel my passion
It means so much to me
Cause if not you'll never know
How big my heart is
I dare to say the day won't come
And we will separate

You're on the road to nowhere
You need to get it now
Before you're all alone
It's not too late to turn back
I'll guide you home
Be sure that help is on the way

All I know is that it's time to awake before it never
ends
All I know is that it's time to awake before you walk
the line

Will you ever really try
To feel my passion
It means so much to me

Cause if not you'll never know
How big my heart is
I dare to say the day won't come
And we will separate
