Count it! One year later Met with death, miles, goodbyes States, cities, friends all converted into time Yet on the road From family and home It feels like, it just feels right Show to show we saw the crowds grow We played our hearts out, We wore our throats down And every drop of sweat that we bled has been worth it Cause we earned it We'll weather the rain, the sleet, the snow and oceans Just to get through to you We'll weather the rain, the sleet, the snow and oceans Just to get through to you
