

# Make A Run For It / The Call Out

## Hit the Lights

Let's leave these lives tonight  
You can find us by the trail of our insides  
They were left at the scene of the crime  
We've tampered with evidence  
Finger prints were left behind

So lets cut cut cut to the chase  
We need to get get get our story straight  
This is what were hoping  
Covers blown wide open  
We can make a run for it  
We can make a run for it  
We've got this down to a science baby  
Don't be afraid, be very afraid  
We've got this down to a science baby  
We don't make mistakes, we don't intend to make

Complex calculated overlooked and underrated  
We've got this down  
We've got this down

So lets cut cut cut to the chase  
We need to get get get our story straight  
Cut to the chase  
We can make a run for it  
We've got this down to a science baby  
Don't be afraid, be very afraid  
We've got this down to a science baby  
We don't make mistakes, we don't intend to make

Taking what we can  
We're modern day cut-throats  
We're breaking all your plans  
Staking out every road  
Taking what we can  
We're modern day cut-throats  
We're breaking all your plans  
Staking out every road

To lure you in and set you up  
(We won't back down, you know that we can do this)  
To take our fall and now it's over  
(With or without you, with or without you)

To lure you in and set you up  
(We won't back down, you know that we can do this)  
To take our fall and now it's over  
(With or without you, with or without you)

We've got this down to a science baby  
Don't be afraid, be very afraid  
We've got this down to a science baby  
We don't make mistakes, we don't intend to make

We've got this down to a science, a science baby  
(We won't back down, you know that we can do this)  
We don't make mistakes, we don't intend to make

(With or without you, with or without you)  
We've got this down to a science baby  
(We won't back down, you know that we can do this)  
Don't be afraid, be very afraid  
(With or without you, with or without you)  
We've got this down to a science baby  
(We won't back down, you know that we can do this)  
We don't make mistakes, we don't intend to make  
(With or without you, with or without you)

(We won't back down, you know that we can do this  
With or without you, with or without you)
