

Say What You Wanna Say

Hit the Lights

Out of friends at an end for sure
When you've got no side to side with
You deal with that

Its a waste of this taste if you think that I
Ever want a confession over now in time

Say what you wanna say,
Its not gonna change anything
You've got it wrong, (god I had it)
Blame who you wanna blame
Its not gonna change anything

So, say what you wanna say,
Say what you wanna say

Turn it on, crank it up
Get whats coming to you
You let your friends down
Let me tell you how
After Matt came back he said,
"That your talk is cheap"
Your rules, you never bite your teeth from the enemy

So, say what you wanna say,
Say what you wanna say

Turn it on, crank it up
Get whats coming to you
You let your friends down,
You let your friends down

They take you back, take you back
And forgive every single word,
Word, word, word, word, word
They take you back, take you back
Take back every single time
I stuck my neck out and let my guard down
All I could of spent on everything but you

What you wanna say
Say what you wanna say
What you wanna say
Say what you wanna say
