

# Artificial Extinction

Hocico

We are lost, we're longing for a fix  
The real us is in the cloud  
We don't live in the present 'cause the present dies  
Conscience into overdrive

We are running out of life, we're running out of time  
Always on the limits, the speed of light  
Upload your mind to live, upload your mind to fly  
Seven billion people were just born to die

This is the final extinction, our destiny  
Creators of our own destruction  
Slaves to dark technology  
This is the final extinction, our destiny  
Assimilation of reality, surrender to the machine

We will be erased, erased from Earth  
Conscience into overdrive  
We will be erased, erased from Earth  
Conscience into overdrive  
We are lost, no reason left to fight  
Resistance is futile, we're out of our minds  
We sold our eyes 'cause we've been always blind  
We sold our lives 'cause they always had a price

We are running out of life, we're running out of time  
Always on the limits, the speed of light  
Upload your mind to live, upload your mind to fly  
Seven billion people were just born to die

This is the final extinction, our destiny  
Creators of our own destruction  
Slaves to dark technology  
This is the final extinction, our destiny  
Assimilation of reality, surrender to the machine

Extinction  
This is our extinction  
Extinction  
This is our extinction  
Extinction  
This is our extinction  
Extinction  
Everyone dies

This is the final extinction, our destiny  
Creators of our own destruction  
Slaves to dark technology  
This is the final extinction, our destiny  
Assimilation of reality  
Surrender, surrender, surrender to the machine
