

Golden Eagle

Holly Macve

Fly away golden eagle
Before you feel the pain
The a sky waiting for you
So let your feet escape the chains

Run away my hero
You have done all you can do
There's a field just over the valley
Where the wind will blow the troubles from you

And although you're far from sight
You're still burning bright in me
And although you're far from sight
You'll remain the core of me

Fly away golden eagle
Before the cold winter comes
And I'll be thinking of you
As warm as the heat from the burning sun

And although you're far from sight
You'll never see so far away from me
And although you're far from sight
You'll remain the heart of me

Ooh...

Fly away golden eagle
Before you feel the pain
The a sky waiting for you
So let your feet escape the chains
