

Messed Up

Holy Holy

I don't know why
I'm lost
Staring in your eyes
I feel caught
In between your lies
Where were you?
Through all those nights, I was lost and alone
I was lost and alone

On a hangover I see the sun is up
If I gave you everything, would that be enough?
If I'm losing feelin' now would you stay in touch
Been through the motions and now I've had enough
We both let out pain and now we wanna love

But being with you feels so damn messed up
But being with you feels so damn messed up
But being with you feels so damn

It was all messed up
Crowded and empty
The weight strange and heavy

And when the sound went out
And we watched and we waited
And our bodies betrayed us

And if it came to it, would we fly away
Would we move back up? Were we safer there anyway?

And we sat up late talking into the night
Tryna get it straight, tryna realize what it was

But being with you feels so damn messed up
But being with you feels so damn messed up
But being with you feels so damn messed up

I don't know what's become, what's become
But I'll be here, love, we can make it up

Being with you feels so damn messed up
Being with you feels so damn messed up
I don't know what's become
Being with you feels so damn messed up
But I'll be here, love, we can make it up
Being with you feels so damn messed up
