Don't keep me any longer I can't hold my breath It's cold beneath the water but I understand At least we had a story, wasn't that the plan? I always wear your sweater, please don't hold my hand So can we call it over if I'm still beneath The weight of primavera when you finally sneaked Into my little bedroom when I had to pee At least you said goodbye Take me out tonight I really want to know that it's alright That maybe we could talk, I'll buy your flight Don't tell me no What if we had it all? I think we're better than this You changed it all, it's not your fault You changed it all, it's not your fault (It's not your fault) I danced upon your table to your quiet laugh You called me Miss America when you would pass You're still beneath the pear tree every time I dream Ognuno volará Take me out tonight I really want to know that it's alright That maybe we could talk, I'll buy your flight Don't tell me no What if we had it all? I think we're better than this You changed it all, it's not your fault You changed it all, it's not your fault (It's not your fault) I can't hide all the utter pain I'm probably much too ashamed I can't think of saying your name, I, I, I I honestly feel I've not changed I know when we met it was fate I hope that you'll hold me again, I, I, I What if we had it all? I think we're better than this You changed it all, it's not your fault You changed it all, it's not your fault (It's not your fault)

What if we had it all?

(It's not your fault)

I think we're better than this

You changed it all, it's not your fault You changed it all, it's not your fault
