Number One

Holychild

Everybody's so new
Everybody's so new
I forgot about you
I forgot about you
That's what I'm told to do
(To forget about you
To forget about...)
Everybody's so new
Everybody's so new
I can't remember what's true
Can't remember what's true
That's what I'm told to do
(To forget about you
To forget about...)

I know it's not for me but I can't go
Anyone's number one if you say so
Yet for now, can't we live above?
'Cause for now, everyone's so f*cked

Oh the world is so cruel
Oh the world is so cruel
They only talk about the fool
They only talk about the fool
That's what they're told to do
(Only talk about fool
Only talk about...)
What if I told you I'm through?
What if I told you I'm through?
We never talk about the truth
Never talk about the truth
That's what we're told to do
(Never talk about truth
Never talk about...)

I know it's not for me but I can't go
Anyone's number one if you say so
Yet for now, can't we live above?

'Cause for now, everyone's so...
I know it's not for me but I can't go
Anyone's number one if you say so
Yet for now, can't we live above?
'Cause for now, everyone's so f*cked

Get it, get it, get it, everybody's dying either way
Breathing but not feeling, is it even living anyway?
I'm trying not to notice all the things you've put inside my head
I'd rather dance in front of mirrors and jump on top of a hotel bed
Tell me, tell me, tell me, is the passion dying every day?
When you find me bleeding, are you happy 'cause you got your way?
I'm living in the moment or the future or the past, for now
I'd rather run away forever but I really just don't know how

I know it's not for me but I can't go
Anyone's number one if you say so
Yet for now, can't we live above?

```
'Cause for now, everyone's so...
I know it's not for me but I can't go
Anyone's number one if you say so
Yet for now, can't we live above?
'Cause for now, everyone's so f*cked
```

'Cause for now, everyone's so...
I know it's not for me but I can't go
Anyone's number one if you say so
Yet for now, can't we live above?
'Cause for now, everyone's so f*cked
