

Knew You When

Honeymoon Suite

Born too late never learned to crawl
Smacked your head
Welcome to the world
It did you good and ya came up hard
Ya drew from nothin'
And ya took it real far
Somewhere along you went wrong
Ya let 'em take it away

I knew you when you weren't afraid of what I'm sayin'
I knew you when you wouldn't change for anyone
I knew you when you were a part of me
Whatever happened to that personality?

Do you like it out there
In the dark and cold?
And you're hungry again, a little more old
Diggin' for courage and lookin' for why
Dreamin' on your whole damn life
So harder now, you've forgotten how
Ya can't give it away
