

## So Hard

### Honeymoon Suite

This house gets a little darker now  
Each time you've gone away  
We got used to something, forget the blame  
I look around, and I might as well be  
One foot out the door, in your memory  
Where I, where I used to be

How could you be so hard?  
You're runnin' away with my heart  
Everything I should be  
How could ya be so...  
How could ya be so hard?

You ain't the easy answer  
That I thought you were  
When you wait for somethin,  
It never returns  
I look around, but I don't see  
All that anymore  
Where we... uhhuh  
Where we used to be

How could you be so hard?  
You're running away with my heart  
You don't know what you got  
How could you be so hard?
