

Me & You

Honne

It's one small step for man
One giant leap for mankind

You came into my life with no warning
Like a flash of light
And I was doing fine but as you came in
I watched my future rewrite

I'm not ready, I am not prepared
I was so steady, on my feet but now I'm up in the air

It's just you and me
With the world beneath our feet
We can see for miles up here
We can go wild up here
It's just me and you
Now we're taking in the view
We can spend the rest of our days
Way up here, just me and you

See, I like you a lot
You make me buzz like an astronaut
These feels I can't shake off
I'm in your orbit and I will never drop

I'm so ready, yeah, take me as I am
You're worth every penny, yeah, I'll pay all I can

It's just you and me
With the world beneath our feet
We can see for miles up here
We can go wild up here
It's just me and you
Now we're taking in the view
We can spend the rest of our days
Way up here, just me and you

I'm not ready, I am not prepared
I was so steady
On my feet but now I'm up in the air

It's just you and me
With the world beneath our feet
We can see for miles up here
We can go wild up here
It's just me and you
Now we're taking in the view
We can spend the rest of our days
Way up here, just me and you
