

Tonight's The Night

Honor Society

There's gotta be an easier way
For me to get close to you
Cause every time I take a look
I wanna see the real you
I might be shy, but not tonight
No hesitation of making my move, uh huh
Just one little sign that's all I need
Could you how could you be playing it cool

Tonight's the night we're gonna turn it around
Take the chance I know we have to
To make it we'll have to go on our own
And love will see us through

She's a girl that will drive me crazy
She need attention wherever she goes (she knows she's fine)
So I tell myself to walk away
But again I'm already too close
So we can go we can go meet you around the way
Play it so that they'll never know
Just one little sign that's all I need
You could say yes and why would you say no

Tonight's the night we're gonna turn it around
Take the chance I know we have to
To make it we'll have to go on our own
And love will see us through

See you with me
See you with me
I can see you with me
I can see you with me

Tonight's the night we're gonna turn it around
Take the chance I know we have to
To make it we'll have to go on our own
And love will see us through

Tonight's the night we're gonna turn it around
Take the chance I know we have to
To make it we'll have to go on our own
And love will see us through
And love will see us through
