

It was a day like today
These pleasures long overdue
It was a day just like this one
An urgency to feel something new

We cheat our own slender odds
In truth, we know what we are
The deal is closed in this moment
We'll build our repertoire
An equinox between near and far

Winter like summer, okay
Summer meets winter halfway
It was a day like today
Welcome tomorrow today
Pack all your sorrows away
It was a day like today

It was a day like today
6-3-0-3-21
There will be so many chances
Anticipate
The place that I am from
Imagine all the nights yet to come

Winter like summer, okay
Summer meets winter halfway
It was a day like today
Welcome tomorrow today
There can be no other way
It was a day like today
A day like today

You never know what's coming
You never know what's coming
You never know what's coming
You never know what's coming
You never know
You never know
