

I Come From Your Future

Hoodoo Gurus

You had your fun. So it shall end
Now you are done. Never again
This here's a fact you can't deny
Under attack you will comply

Souls in a carnival
Heaving about you
Best you accept it
I'm leaving without you

From the future
From the future
From the future
I come from your future

All you desire is out on loan
All that you love long overgrown
It was a dream, kiss it good-bye
We reign supreme. You gonna fry

Pray to your god
If you hold that delusion
Fall to your knees
I enjoy your confusion

From the future
From the future
From the future
I come from your future

From the future
From the future
From the future
From the future
From the future
From the future
From the future
From the future
From the future
From the future
From the future

Here I come
From your future baby
Future events such as these
Will affect you in the future
Now. Right now
I am your future
