

Moontime

Hope Tala

I'm looking for someone to take it slow
Maybe we could spend some time together see how it goes
And you were in the dark but now you know
That these days I like to keep myself closed

Baby can you please show me the way out
Because I've been here for some time now
Now, now

I've been here for some been here for some time
And she was never supposed to be mine
I've been here for some been here for some time
And she was never supposed to be
She was never supposed to be mine
She was never supposed to be
She was never supposed to be mine
She was never supposed to be
She was never supposed to be

What do you think about the sky in the autumn
I wasn't sure about these stars but I bought them
And the sun comes quicker if you call her
But the moon isn't beckoned by you
And she was La Lunar through and through
Turned me blue as I flew through her shades of grey
Never here to stay that's true

Baby can you please show me the way out
Because I've been here for some time now
Now, now

I've been here for some been here for some time
And she was never supposed to be mine
I've been here for some been here for some time
And she was never supposed to be
She was never supposed to be mine
She was never supposed to be
She was never supposed to be mine
She was never supposed to be mine
Mine
She was never supposed to be mine
She was never supposed to be mine
Mine
She was never supposed to be mine
