

Hospital

Horse Head

Though it seems our love has died
It comes alive in the morning light
Just take my hand, just take my hand
We'll find a way, it'll be alright

We go to a place we know
We know not where we go
We go where we feel at home
When I get home it's time to go

Use me, go and and use me
Use me, go on and on
And fool me, go on and fool me
Fool me around

Though it seems that I have tried
At least a thousand times
Just take me away
Just take me away
To the hospital
It'll be okay

We go to a place we know
We know not where we go
We go where we feel at home
When I get home it's time to go

Use me, go and and use me
Use me, go on and on
And fool me, go on and fool me
Fool me around

We go to a place we know
We know not where we go
We go where we feel at home
When I get home it's time to go

We go to a place we know
We know not where we go
We go where we feel at home
When I get home it's time to go
