

## Weekend

Horse Head

You don't know where to start  
But when you pulled out my heart  
You found passion there inside of me  
Besides, I think you really like me  
But your friends don't excite me  
I think, We should go somewhere to be alone  
I don't just wanna talk about it  
I just wanna be about it  
Use me like a knife  
Baby, we could cut right through it  
Yeah I really do this  
Not just on the weekend  
Baby, you should slow down  
Yeah that's what you're thinking  
I do what I have to do  
But I keep on coming back to you

I don't know where to start  
But when I pulled out your heart  
I found passion there inside of you  
Besides, I think I really like you  
And you make me wanna die too  
And I love it, but I hate it  
Baby we could get famous  
I like the way you don't care  
You do what you have to do  
I know you won't want stay there  
You want to come right back to me  
There's something in your eyes only I can see  
(There's something in your eyes only I can see)  
You're like the fire that's inside of me
