

# Down

Hot Chip

Down  
To the ground, baby  
You sure know how to break it on down  
To the ground, baby  
Down  
To the ground, baby  
You sure know how to break it on down  
To the ground, baby  
Girl, know how to break it on down

You've got to work me until you get what you need  
(Girl, know how to break it on down)  
You've got to work it until it breaks, don't you see?  
(Girl, know how to break it on down)  
You've got to work me until I'm starting to bleed  
(Girl, know how to break it on down)  
Reset, erase me till I lose sight of my dreams  
(Girl, know how to break it on down)  
You've got to need me 'cos I mean nothing to me  
(Girl, know how to break it on down)  
You've got to work me into the dust you can't see  
(Girl, know how to break it on down)

I'm on the edge of just screaming  
Screaming out your name  
But then I know that I'm dreaming  
Dreaming my life away  
Well, someone just had to stop me  
Take me out of the frame

(Girl, know how to break it on down)  
(Girl, know how to break it on down)

All work and no play makes Jack a dull boy, oh boy  
(Girl, know how to break it on down)  
But if this is working, it makes my play null and void  
(Girl, know how to break it on down)  
Until I met you I never worked for one day  
(Girl, know how to break it on down)  
But now we're working this work is starting to pay  
(Girl, know how to break it on down)  
You've got to use me until I run out of juice  
(Girl, know how to break it on down)  
But don't replace me, maybe a screw has come loose

I'm on the edge of just screaming  
Screaming out your name  
But then I know that I'm dreaming  
Dreaming my life away  
Well someone just had to stop me  
Take me out of the frame

Break it down, don't bring me down, my baby  
Break it down right to the ground, my love  
Break it down, don't bring me down, my baby  
Break it down right to the ground, my love  
(Girl, know how to break it on down)
