

Love Is The Future

Hot Chip

Baby roll off the high end
And let's get the guitar track right
We don't know where this day ends
But we know we've got tonight
You know I find a sadness
In dark, in dark of night
Alone and I'm wondering
Wondering for something so right

When I'm with you, we're only losing time
Drinking the hours, as I pour you and you sip from mine
When I'm with you, what's real is out of mind
Dreaming is binding, stay close to me as we redefine

Connection, correction
Connection, correction
Correction, correction
Correction, correction

We've been staying up all night
Been just deleting the days
Something happens at midnight
When the world is torn and frayed
I'm in love with the daylight
But find it hard when rearranged
Nothing's better than stage fright
We turn heads as we turn on a phrase

I threw up my fist but she spiked my punch
So I couldn't fight all her moves, she turned the light off
She spoke the words and unravelled my pen
And parts of my body that had devil and sin
She took the stand for one night, so one might
Not believe the thoughts received
But remembering her thighs keep my eyes shut
I told her now you in my hut
And I housed her, by design
But she now owns real estate on my mind
Now this all started from Excuse me Miss
Drunk on ethics, Socrates' pissed
The wish of a well connects to my gut
And the preacher said the devil lives in a struggle
She ain't got wings but bless her mama
My nerves saying it feels like nirvana

When I'm with you, we're only losing time
Drinking the hours, as I pour you and you sip from mine
When I'm with you, my heart is on the line
Dreaming is binding, stay close to me as we redesign
My love, my love

(Connection)
Our love is the future
I thought we would never see
Let's move to the future
Where you can connect with me
(Connection)

Our love is the future
I thought we would never see
Let's move to the future
Your love has designs on me
(Connection)

Our love is the future
I thought we would never see
Let's move to the future
You're moving inside of me
