

# Time

Hot Chip

We're out of luck  
But just in time  
And who knows what  
We might still find

Fly, fly away  
Searching for a place where we can end this endless day  
Come what may  
Maybe in the right way we'll be led astray  
We're longing to be led astray

I feel brave  
With my buddies close behind me, we will ride this fearsome wave  
Watch us play  
Wading in the shallows while the breakers roll away  
Oh how we raved

And they say time will heal you (Time will heal you)  
Do they know what you've been through (Time will heal you)  
But boy I feel you (Time will heal you)  
Your bones and sinew (Time will heal you)  
And it seems to me  
Through the gray I see  
Where you are taking me  
Is not where I wanna be

We're out of luck  
But just in time  
And who knows what  
We might still find  
We're out of time  
But still in luck  
And who knows how  
To stop the clock  
We're out of time

I have to say, who would want to hear the words  
Spill out and fade away  
Filling up the room with gloom  
For just another day  
Surely there's another way

And they say time will heal you (Time will heal you)  
Do they know what you've been through (Time will heal you)  
But boy I feel you (Time will heal you)  
Your bones and sinew (Time will heal you)  
And it seems to me  
Through the gray I see  
Where you are taking me  
Is not where I wanna be

We're out of luck  
But just in time  
And who knows what  
We might still find  
We're out of time  
But still in luck

And who knows how  
To stop the clock  
We're out of time

We're out of  
We're out of time  
We're out of time  
We're out of
