

## Children Of Spacemen

Hot Chocolate

The air that we breathe, breathe out  
Is the air the plants breathe in  
So round and round the question goes  
Just how did life begin?

Is there an Adam and Eve or some evolution plan  
Are we seeds from other stars  
The wind brought to the land  
Children of spacemen

Spaceships high in the sky  
Appear before man's eye  
Are they fantasy of men  
Insane or foolish lies

For a heaven plan by the Father of earthmen  
Far beyond imagining of us through all children  
Children of spacemen

I believe in a Father of all of Mankind  
I believe that the universe is in seventh divide  
I believe we're children, I believe the world is a child  
I believe we're children, I believe the world is a child  
Children of spacemen
