

Blue

Hot Flash Heat Wave

If you've been feeling blue
Then I've got the song for you
To right the wrongs inside your heart
Let's make tonight a brand new start

Let go out
Let's paint the town in brilliant colors
It doesn't matter what you wear
Or the condition of your hair

Let's get out
Right now while no one can stop us
I know the city gets you down
Let's turn the whole place inside out
And forget about it all

Come on baby
Why don't we go out?
Come on baby
Let me take you out

The nights alive with signs and stars
They call to the darkest corners of our lonely hearts
Burning with wild abandon
Feed fuel to the fire
It's ready to ignite

Come on baby
Why don't we go out?
Come on baby
Let me take you out

You know, that the night
Can fill your heart again
We don't have time to play around my friend
Oh no

La La La
La La La La
La La La La La
Ooooooh
Ooooooh

La La La
La La La La
La La La La La
Ooooooh
Ooooooh
