

# Take Your Jacket

Hot Milk

You want your song?  
Well, here's an anthem  
You broke my heart and held all of my past to ransom  
Well, get a grip  
You're not that special  
Trying to slip around the demons that you wrestle

(Don't get me wrong)  
I'm trying my hardest  
(Don't get me wrong)  
But sometimes the smart ain't strong

Take your jacket out my car, out my car  
So I can forget who you are, who you are  
Fall forward, fading through catastroph-eeling  
Like the storm will never pass  
Break the mould, reshape the past

Came from beneath and knocked me over  
Rotting my teeth, you're sickly sweet like cherry cola  
No, not this time, no, you won't fool me  
Your childish tricks are in the past, I can guarantee

(Don't get me wrong)  
I'm trying my hardest  
(Don't get me wrong)  
But being the smartest ain't too clever

Take your jacket out my car, out my car  
So I can forget who you are, who you are  
Fall forward, fading through catastroph-eeling  
Like the storm will never pass  
Break the mould, reshape the past

Take your jacket out my car, out my car  
So I can forget who you are, who you are  
Fall forward, fading through catastroph-eeling  
Like the storm will never pass  
The hole you left is sore at best  
We know this wouldn't last, reshape the past
