

Jericho Sirens

Hot Snakes

I hear something strange
It seems out of range
It's guiding us- a whisper
Now it's like a pain [?]
Once I knew I was in my right mind
I made a beeline straight for you
Said "I think I'm hearing things"
And there's something you helped me prove
You leaned into me carefully
Took your hand in mine
I put my ear to your ear
This time I really tried, you said

I hear Jericho sirens, Jericho sirens
I hear Jericho sirens
I hear Jericho sirens

An auditory parasite

Boring a hole in my head
No one seems to believe me
But now it's like a pain [?]
Once I knew I was in my right mind
I made a beeline straight for you
Said "I think I'm hearing things"
And there's something you helped me prove
You leaned into me carefully
I took your hand in mine
I put my ear to your ear
This time I really tried, you said "I hear"

Take cover!

Jericho sirens, Jericho sirens
I hear Jericho sirens
I hear Jericho sirens
