

Shake Up the Shadows

Hot Water Music

I want to see that smile
Radiate for miles
Wake up and hold that light
To shake up the shadows right

I know the madness
Has all become the normal
I'd hate to regress
Degenerations futile
Some reek of power
While I seek not to wither
My will's gone sour
Fermented failures sifted

I want to see that smile
Radiate for miles
Wake up and hold that light
To shake up the shadows right

I'd love to trade all
The old foundations rusted
My tongue is twisted
My recollection's busted

No point in holding on
To pressure boiling over
No point in holding
On to whats insane

I'll say long to the high of innocence and reminiscing
I'm holding on to the shine that saved me
And the time that you gave and the time I stripped away

I want to see that smile
Radiate for miles
Wake up and hold that light
To shake up the shadows right
