

Best In Me

Hotboii

I've been broken-hearted before
They say it happens to the ones who've been solid the most
And I know anything is possible
Yeah, I tried, but I can't shake you and I would like to know why
You bring out the best in me
I've been fiending for your love desperately
I don't want you to never leave
You can go where you want as long as you next to me

You can go wherever you want, long as you're next to me
She do the most when no one pick up and no one be texting
I don't text hoes, if I do reply, that'd be a blessing
My neck froze, I just fill my shit with VVS

Baby, you so thick, them lil jeans, how you get in them?
Bae, you know you are Kareem how I'm swimming in
Yeah, we fuck and we fight, guess we beefin' then
Every time she walk by, I be giving in

Said, baby, you give me strength when I weak
I might buy you a Birkin just to hold that bangle for me
Know when my mama close her eyes, she be praying for me
She heard there's money on my mind, she got it in the streets

I've been broken-hearted before
They say it happens to the ones who've been solid the most
And I know anything is possible
Yeah, I tried, but I can't shake you and I would like to know why
You bring out the best in me
I've been fiending for your love desperately
I don't want you to never leave
You can go where you want as long as you next to me

And this song right here, I should have named it 'bout you
'Cause I made it 'bout you
I go crazy 'bout you
I just left the booth, I'm on the road thinking 'bout you
You bring sand to the beach and ain't no sand without you

I want you be there when I'm performing
The way you make me feel, it ain't normal
Help me understand why my heart's so numb, so numb
Just picture me and you in a Rolls Royce
Compared to you, these hoes ain't making no noise
If you riding, then you riding, it's your choice
If it was meant to be, then it'll happen, no force

I've been broken-hearted before
They say it happens to the ones who've been solid the most
And I know anything is possible
Yeah, I tried, but I can't shake you and I would like to know why
You bring out the best in me
I've been fiending for your love desperately
I don't want you to never leave
You can go where you want as long as you next to me
