

We're All That We Got

House of Lords

We're all that we got
In the power of you and I
We're all that we got

It's in the atmosphere
I feel it here
Inside of me

It's in the rolling waves
And the winds of change
This uncertainty

It's like a whisper in my ear that keeps on coming
And I can't keep on pretending that's it's nothing

Before it's all too late
Before it breaks
Gotta make you see

We're all that we got
Though we're a long shot
We got the power of you and I

We're all that we got
Though we're a long shot
We got the power of you and I

Now there's no looking back
From where we're at
Trying to change what was

We gotta keep in mind
What's left behind
For the ones we love

We got to fight for every right that we believe in
We gotta build a future you and I can breathe in

So now we'll plant the seeds
And lose the creed
That got us here

We're all that we got
Though we're a long shot
We got the power of you and I

We're all that we got
Though we're a long shot
We got the power of you and I

We're all that we got
Though we're a long shot
We got the power of you and I

I don't wanna wait for the beauty in this world to die

We're all that we got
In the power of you and I
We're all that we got
In the power of you and I

We're all that we got
Though we're a long shot
We got the power of you and I

We're all that we got
Though we're a long shot
We got the power of you and I

We're all that we got
Though we're a long shot
We got the power of you and I

I don't wanna wait for the beauty in this world to die

We're all that we got
We're all that we got
We're all that we got
We're all that we got

We're all that we got
In the power of you and I
