

Take Us Higher

Howard Jones

Will take us higher
Take us higher, will take us higher

Got something to tell you
I think you should know
You're surely one of a kind and your secret is starting to show
No one superior, no one inferior
Just apples and peaches and oceans and beaches
Just standing there all in a row

Just a word in your ear time to say I'm going live
When the world makes a u-
turn straighten the wheel, go for a drive

Start the swing, feel the air
Every kick will take us higher
Start the swing, feel the air
Gravity will take us higher

You got the tough stuff
You got the heart
You may have to dig in the dirt til you find something shiny and smart
Don't want to say it again
You got to push through
There's always work to be done and the person to do it is you

Just a word in your ear time to say I'm going live
When the world makes a u-
turn straighten the wheel, go for a drive

Start the swing, feel the air
Every kick will take us higher
Start the swing, feel the air
Gravity will take us higher
Start the swing, feel the air
Every kick will take us higher
Start the swing, feel the air
Gravity will take us higher
