

Oxygen

Howie Day

Can you tell me how we... get there from here?
High in the canyon we can both disappear
Got a change of reason yeah, this much is clear

Can you help me get back, back to the place
Where I was when we got. carried away
Got a new rush feeling all I can say

Your like oxygen
Your like a midday sun
Your like a miracle drug in the morning love
That keeps me moving on

Your like a summer rain
Something I just can't explain
Could it be another way
Is it really that difficult to say

Do you remember falling...heels over head?
We spent the afternoon...just lying in bed
Got a jones for Moser and the promise you said

Your like oxygen
Your like a midday sun
Your like a miracle drug in the morning love
That keeps me moving on

Your like a summer rain
Something I just can't explain
Could it be another way
Is it really that difficult to say

And when I start to reel
You take the steering wheel
You give something that I never knew I was missing
You give me something real

Your like oxygen
Your like a midday sun
Your like a miracle drug in the morning love
That keeps me moving on

Your like a summer rain
Something I just can't explain
Could it be another way
Is it really that difficult to say

Is it really that difficult to say
Is it really that difficult to say
Is it really that difficult to say

Can you tell me how we... get there from here?
