

Massive Destruction

Howler

Lies lurking from empty skulls
An evil smile, masquerading the dark
Mindless ambitions will fade away
All you can see is chaos in the land

Words fly away in the wind
Honor and fear sucked out by pride
Wars driven by an evil will
Growing stronger under a red sky

(Chorus)

Looking at Terror's face
Living the massive destruction
Trying to escape this deadly race
Die with the massive destruction

They think that the job is done
Living the massive destruction
But now they see their thoughts were wrong
They die with the massive destruction

Harvesting threats in a field of death
A promise of peace, just an empty word
Ignoring that Justice is after him
The Dark Lord keeps preaching all over the world

He is forging his own fate
Breathing the evil that comes from within
His sins will follow him
Money and prestige, his way to deceive

(Chorus)

Doom!, is what they seek
To cause suffering to mankind
Fight!, we are unite
Together we'll burn them alive

Delusion!, they just can't see
Their condition limits how they think
Death!, smiles on me
The time to be free now is here

Awake!, and realize
The power to fight is in your hands
Live!, don't be afraid
And break all the chains in your head
