

# Time to Make Our Move

Howler

Lightning and thunder from deep inside  
The call of the Muses, something we must attend  
The engines are ready, listen the hungry wolves  
Take us where it all began

The energy is flowing always between our souls  
Higher and higher, there is no turning back  
Hold on tight, this machine can not be stopped  
A fire that never goes out

Time to make our move  
The way is clear

Now all the big walls are falling down  
There's a chance to take a look around  
It's time to make our move and take the fire  
Be prepare for this or run to the other side

Feel the fire burning right now  
Unslave your soul and be free like me  
Make your own way and never stop  
Don't look back and always run free

The road is long, maybe it has no end  
It is tortuous and full of obstacles  
We must be strong, fight the shadows around  
The journey is worth it all

With the wind in your face once again  
The agony is leaving just like the night and day  
Time won't stop for you so never give up  
Your fire won't go away

Time to make our move  
The way is clear

Now all the big walls are falling down  
There's a chance to take a look around  
It's time to make our move and take the fire  
Be prepare for this or run to the other side

Feel the fire burning right now  
Unslave your soul and be free like me  
Make your own way and never stop  
Don't look back and always run free

Time to make our move  
The way is clear

Now all the big walls are falling down  
There's a chance to take a look around  
It's time to make our move and take the fire  
Be prepare for this or run to the other side

Time to make our move  
The way is clear  
Time to make our move

You'll never tame me
