

How It Ends

Huddy

I still remember
The night that I met you
'Cause I was lonely
And you were lonely too
We left the party
And walked around the block
I poured my heart out
And you just barely talked
So fast forward, the summer came and went
Then it got colder, we lost our innocence
We couldn't handle all the ups and downs
Just like Titanic, she let me go
I drowned

You tell me that it's history
That you don't even miss me
But I know you remember
It was you that said forever, my love
And now your love is see-through
Could die but never leave you
If all of this was acting
Then why's the feeling lasting, my love?

Just like a movie
I watch every scene, but lay in my head
What are we doing now?
When we both know how it'll end
Just like a movie
I watch every scene, but lay in my head
What are we doing now?
When we both know how it'll end

I feel like calling
Is that a big mistake?
My heart is broken, you like it more that way
It wasn't easy, you know it hurt like hell
I wish that I could say that I wish you well

You tell me that it's history
That you don't even miss me
But I know you remember
It was you that said forever, my love
And now your love is see-through
Could die but never leave you
If all of this was acting
Then why's the feeling lasting, my love?

Just like a movie
I watch every scene, but lay in my head
What are we doing now?
When we both know how it'll end
Just like a movie
I watch every scene, but lay in my head
What are we doing now?
When we both know how it'll end
