

Nightshift

Hugo

Out across the silver sea
Baby there's always you and me
And we've got no choice but just to ride it out
It's where you are, not where you've been

Anything that gets me home
A late night remedy
Restless wound up energy
You only see straight in this town twisted

Anything that gets me home
A late night remedy
Restless wound up energy
You only see straight in this town twisted

Cool off, slow down, right now
Get on the nightshift
Get on the nightshift

No way out, just touch the sky
We're making starlight as we fly
Let chase down the fading light
The last embers of tonight

Anything that gets me home
A late night remedy
Restless wound up energy
You only see straight in this town twisted

Anything that gets me home
A late night remedy
Restless wound up energy
You only see straight in this town twisted

Cool off, slow down, right now
Get on the nightshift
Get on the nightshift

Anything that gets me home
A late night remedy
Restless wound up energy
You only see straight in this town twisted

Anything that gets me home
A late night remedy
Restless wound up energy
You only see straight in this town twisted

Cool off, slow down, right now
Get on the nightshift
Get on the nightshift

Cool off, slow down, right now
Get on the nightshift
Get on the nightshift
