

## Under Siege

### Human Fortress

One day of shame  
We're longing for a second chance  
But we didn't heed  
The warning from our enemy  
The breach is irreversible

Under siege  
We fight behind our gates of steel  
The king of war we're still fighting for  
We swear an oath so heaven can't wait  
It's no time to die  
We will recover from the storm  
Raise our swords before we're gonna fall

They don't gain ground  
But we believe in victory  
Our losses should not be in vain  
My Lord is sneaking up  
Far behind to catch our souls  
A bloody prey he can't let go no
