

Planets

Human Nature

I wanna see you shine up like the sky
I wanna be up there with you so high
And every kiss, every touch, looking in your eyes
I know that I wanna be, I wanna be, I wanna be here forever with you

Feel it now, feel it growing
Bigger than all the oceans
And still just me, just you alone in this room

I'm swinging on stars when I'm with you
Take me to Venus and Mars, no parachute
Yeah, you feel it, too
All of the planets collided when I found you
We're dropping on dreams we've never seen
I see a million light-years for you and me
Yeah, we're evergreen
All of the planets collided when I found you
When I found, when I found, when I found you

I wanna feel the space between us close
I wanna be the reason that you're glowing
Every day, every night, flying higher and higher
I wanna feel, I wanna feel, I wanna feel this forever with you

See it now, see it growing
Bigger than all the oceans
And still just me, just you alone in this room

I'm swinging on stars when I'm with you
Take me to Venus and Mars, no parachute
Yeah, you feel it, too
All of the planets collided when I found you
We're dropping on dreams we've never seen
I see a million light-years for you and me
Yeah, we're evergreen
All of the planets collided when I found you
When I found, when I found, when I found you

Gravity can't touch when I touch you
Gravity can't hold me when I hold you

I'm swinging on stars when I'm with you
Take me to Venus and Mars, no parachute
Yeah, you feel it, too
All of the planets collided when I found you
When I found, when I found, when I found you
When I found, when I found, when I found you
When I found, when I found, when I found you
All of the planets collided when I found you
When I found, when I found, when I found you
