Human Nature

Took some time to heal
To get my heartbeat back
Just when I'm ahead
Returning from the dead
She's back again...
She knows just what to say
She always gets her way
Just when I was free
She's back inside of me
She's back again

So tell me why the hell I hear music

Every time she calls I hear music

Is it just the way she loves to confuse me

Oh baby

Just when I moved on

Believed that she was gone

She's back again...

She's back again

Like a predator and prey

She'll tear my heart away

She'll chew me to the bone

Leave me rotting here alone

'Til she's back again

So tell me why the hell I hear music

Every time she calls I hear music

Is it just the way she loves to confuse me
Oh baby

Just when I moved on

Believed that she was gone
She's back again...

She's back again

Like a predator and prey

She'll tear my heart away

She'll chew me to the bone

Leave me rotting here alone

'Til she's back again
