

ring in ur ear

HUNNY

Remember the summer when you bleached my hair
Thought your leather was cool
Had the ring in your ear
Drugs on the couch with the freaks and ghouls
Thought it was forever
Thought it was for good
Conversations on the night we met
Thinking better of thoughts
That hadn't happened yet
Over our folks not being where they should
Thought we would do better
Thought we would do good

Didn't have to lie to feel differently
Always had a ball
Didn't have to lie to feel anything
Never let you

Hang around
Chilling on the outskirts now where nothings changed
Face the crowd
You can hold me down
You can hold me down when I'm out

Dismembering everything about ourselves
Poured into mixtapes for someone else
Dying to forge a new connection
Fill us up yeah fill our deflated hearts
Declarations under midnight blue
Ultra-lounging the car down hennepin avenue
Shooting film and fucking up our lives
We failed sideways but hey we're still alive

Hang around
Chilling on the outskirts now where nothings changed
Face the crowd
You can hold me down
You can hold me down when I'm out

Didn't have to lie to feel differently
Always had a ball
Didn't have to lie to feel anything
Never let you

Hang around
Chilling on the outskirts now where nothings changed
Face the crowd
You can hold me down
You can hold me down when I'm out
