

nightqueen

Hurray For The Riff Raff

You know, they call me the night queen
'Cause I live in the dark
And I don't let nobody near me
And I betray my heart

And I'm addicted to freedom
Well, honey, what good will that do?
Living this lonely life
So separated from you

And, oh, if the world can't find me, oh
I'll leave it all behind me

So tired of running in a pack
I left my home, I can't turn back
So tired of running in these escapades
They got me living up on esplanade

And, oh, if the world can't find me, oh
I'll leave it all behind me

As a species, as life on Earth, we've been dying for millennia
But I built an energy device
It's transformed

Oh, if the world can't find me, oh
I'll leave it all behind me
Oh, if the world can't find me, oh
I'll leave it all behind me
