

Calm In Our Storm

Hyland

Only see the messes that you make
Now you're consumed by the problems that you face

The clouds are moving in, your faith is wearing thin
You question every step, as doubts fill your head

Take heart, he's never gonna leave us
Our God, the strength in our weakness
Come rest in his arms
He is the calm in our storm

You feel forgotten, a castaway
Seems you're all alone it's hard to be brave

No matter where you've been, no matter where you are
Grace is crashing in, his love is not that far

Don't let your hope give out in the fight
He's one breathe from giving you life
He's in control it'll be alright
