

# The Future

## Hyper Crush

When this baby hits 88 miles per hour,  
You're gunna see some serious shit  
Next saturday night,  
We're sending you back to the future

Goin out to all the 80's babys  
Get familiar with Hyper Crush

Take me into the future  
I heard em say  
(Clint Sparks)  
Say say say

Visions of my future  
But this is what I'm use to  
I'm movin like a super sonic rocket for moon dust  
Illusion, some success  
Livin' it up like fuck death  
Enough said  
I must get my destiny  
They say live and let it be  
I say give me my cheddar cheese  
Or I be my enemys  
I'm sorry for you mentally  
The past is what I can't say  
I'm trapped inside the fast lane  
We faster than a sound wave  
I'm bouncin all around space

Take me into the future  
I heard em say  
I know it won't last  
I want it anyway  
Take me into the future  
I heard em say  
I know it won't last  
I want it anyway

I'll take it back the past I can't say  
(Oh)  
I'll take it back the past I can't say  
(Oh)  
I'll take it back the past I can't say  
(Oh)  
I'll take it back the past I can't say  
(Oh)
