

Looking glass

Hypnogaja

There's a place where the garden can take you
Through the looking glass
Find a way with the plants - they can take you
To your path
Chase away all the funny pain
Down the rabbit hole
And another world awaits behind the little door

You can go ask Alice
Just why the hatter is mad

All are welcome in Wonderland
'Till the queen screams off with your head
And life will always get twisted
When you're living it through the looking glass

There's a that cat smiles like
The crescent moon
And the caterpillar that needs a light
On top of his mushroom

You can go ask Alice
Just why the hatter is mad

Next time you see the white rabbit run free
You might not want to follow
Lose your youth, cause beauty is truth
It's just harder to swallow

So go and ask Alice
Why the hatter is mad
She'll turn when you see her
And laugh
