

They Will Arrive

Hypocrisy

Pyramids, hieroglyphs
Why don't you crack the code?
You're not ready yet?
Ancient cities
We left you all the clues
It's not so easy without the pineal gland

The sky is falling down

They will arrive, 'cause we send the bait
They are the gods that made you what you are, never forget
They will arrive, gods among you insects
We've been abused enough
They're back to collect

Restoring the balance
Hidden from the truth
Trying to protect the royal bloodline
Now they're coming for you

Technology hidden within diseases
To have the upper hand
The needs of control of the human rats
So they can kill us all

The sky is falling down

They will arrive, 'cause we send the bait
They are the gods that made you what you are, never forget
They will arrive, gods among you insects
We've been abused enough
They're back to collect

The sky is falling
The sky is bleeding
The sky is falling down

They will arrive, 'cause we send the bait
They are the gods that made you what you are, never forget
They will arrive, gods among you insects
We've been abused enough
We're here to collect
