

Radiation

I Am Kloot

The short wave matter
we can't see
those distant suns
what are they to me
the radiation
falling over me
we can't see
those distant suns
what are they to me
the radiation
falling over me
falling over me

The short wave matter
that we can't see
those distant suns
what are they to me
the radiation
falling over me

The short wave matter
we can't see
those distant suns
what are they to me
the radiation
The short wave matter
we can't see
those distant suns
what are they to me
the radiation

Everything we ever thought
we'd ever want, me and you
well it just came through
it just came true

Everything we ever thought
we'd ever want, me and you
well it just came through
it just came true

Everything we ever thought
we'd ever want, me and you
well it just came through
it just came true

It just came true

Everything we ever thought
we'd ever want, me and you
well it just came through
it just came true
