

## Isolate

### I Declare War

Gutted by this world!  
Darkness beats down upon me  
Heavier than a thousand men  
Alone with the world around me  
Buried in my own fucking head

All this weight I bear is crushing me  
Let it all collapse  
Watch the world explode all around  
We drugged ourselves, a worthless life to lead

Disbelief in these fucked-up fools  
These walls are collapsing-go!  
These walls are collapsing-go!

Let it all collapse  
Watch the world explode all around  
We drugged ourselves, a worthless life to lead

Buried alive in a vast, putrid fucking place  
The scent of this place is disgusting

The hum of noise that comes from masses of humans  
Stuffed in their boxes—it's fucking disgusting

We drugged ourselves  
What a worthless life to lead  
Staring at a box  
It is a gift to isolate  
It is a gift to isolate  
Death eats us away
