

INFATUATION

I Dont Know How But They Found Me

Ooh, and I need you now
But it's infatuation
Ooh, and I need you now
But it's infatuation

Love is the drug
All my diction disappears for her
(Oh, and I need you now)
(But it's infatuation)
And I've been listening too long to Lucifer
(Oh, and I need you now)
(But it's infatuation)

Something is wrong
This obscene occupation
What a drag to drag you down
Into infatuation

You're my latest sick obsession (And I need you now)
And I need you now
You're my latest sick obsession (And I need you now)
But it's infatuation
You're my latest sick obsession (And I need you now)
And I need you now
You're my latest sick obsession (And I need you now)
Oh, but it's infatuation

Pale is the moon
Pay attention if you're counting stars
(Oh, and I need you now)
(But it's infatuation)
'Cause Mephistopheles would love to leave you scars
(Oh, and I need you now)
(But it's infatuation)

And something is wrong with this blank invitation
To retrieve your outworn evening gowns
Shooting my brain
Little shots of salvation
What a drag to drag you down
Into infatuation

You're my latest sick obsession (And I need you now)
And I need you now
You're my latest sick obsession (And I need you now)
Oh, but it's infatuation
You're my latest sick obsession (And I need you now)
And I need you now
You're my latest sick obsession (And I need you now)
Oh, but it's infatuation
You're my latest sick obsession (And I need you now)
Oh, and I need you now
You're my latest sick obsession (And I need you now)
Oh, but it's infatuation

You're my latest sick obsession
I could watch you eat your breakfast

You're my latest sick obsession (And I need you now)
But it's infatuation (And I need you now)
You're my latest sick obsession (And I need you now)
I could watch you eat your breakfast (And I need you now)
You're my latest sick obsession (And I need you now)
(Don't you know)
But it's infatuation (And I need you now)
You're my latest sick obsession (And I need you now)
I could watch you eat your breakfast
Infatuation
