Night and Day

I Fight Dragons

Wanna learn how to walk like you
Wanna know all the things that you do
How to go with the flow and move
Maybe then I could understand the truth

But I look before I leap
Inhibition built into me
Wanna be that kind of free
instead I think then drink then leave

Happy never after...

[Chorus:]
I wanna run night and day
I'm the only one in my way
No matter what I'm after
I become my own disaster
Over and over
I know I'm not alone here but
Somehow I still feel that way
So I'm gonna run night and day

Wanna learn how to make it right
How to win in an all-out fist fight
How to save everyone in sight
Instead I lie awake at night

And I bang on an old guitar
Only one that I've needed so far
And I sing out into the dark
Of life and love and all we are

Making plans for nowhere...

[Chorus]
