

While We're Still Young

I Fight Dragons

No one seems to know where we're even going
But we know we better get there fast as hell
If all we have to show is all we end up knowing well
Then maybe this parade is just as well

Tick, tick, tick the clock moves on
Brick by brick we build our song
Some friends stick and some get gone on the way

As mile by mile we go
Arm in arm or toe to toe
Fight or flight we're always on the run
While we're still young

Put the past behind. Faces to the future
We deny it but we're trying the best we can
One step at a time, used become the users
Until finally we get back where we began

Tick, tick, tick the clock moves on
Brick by brick we build our song
Some friends stick and some get gone on the way

As mile by mile we go
Arm in arm or toe to toe
Fight or flight we're always on the run
While we're still young

Tick, tick, tick the clock moves on
Brick by brick we build our song
Some friends stick and some get gone on the way

As mile by mile we go
Arm in arm or toe to toe
Fight or flight we're always on the run

As mile by mile we go
Arm in arm or toe to toe
Fight or flight we're always on the run

As mile by mile we go
Arm in arm or toe to toe
Fight or flight we're always on the run
While we're still young
