

# Fake

I Prevail

I go to bed with these thoughts that I can't control  
They're feeding on my brain like a cannibal  
I wake up right before I find the antidote  
And now there's one more chance left to crack the code

So I keep digging deeper till I  
Find out what's underneath  
When you pull the mask back and you're all alone  
Tell me, do you like what you see?

Yeah you're empty  
You're hollow  
The fakest one that I know  
If you think that you're special  
Well there's your fuckin' problem  
And when it all comes crashing down  
There's no one left to save you now  
You're so fake, fake fake, fake, fake  
Fake

Every goddamn day it's another low  
Make one false move that's your cover is blown  
The repercussions are yours and yours alone  
You can hide from the world but not for long

So I, keep digging deeper till I  
Find out what's underneath  
When you pull the mask back and you're all alone  
Do you like what you see?

Yeah you're empty  
You're hollow  
The fakest one that I know  
If you think that you're special  
Well there's your fuckin' problem  
And when it all comes crashing down  
There's no one left to save you now  
You're so fake, fake fake, fake, fake

So inauthentic, uninspired  
Say goodbye your times expired  
I am so sick and tired  
Of all your self-righteous shit  
(Oh you're so fucking fake)

Yeah you're empty (empty)  
You're hollow (hollow)  
The fakest one that I know  
If you think that (think that) you're special  
Well it's not my fuckin' problem  
'Cause when it all comes crashing down  
There's no one left to save you now (to save you now)  
You're so fake, fake fake  
You're fake  
You're so fucking fake
